

EMS Data Pro™

See your data more clearly

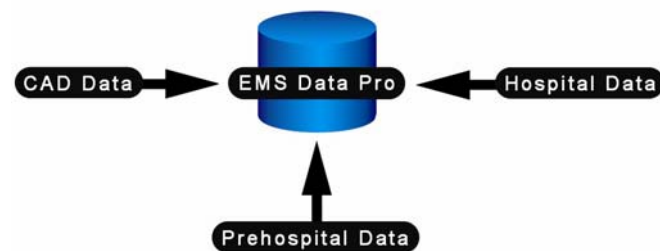

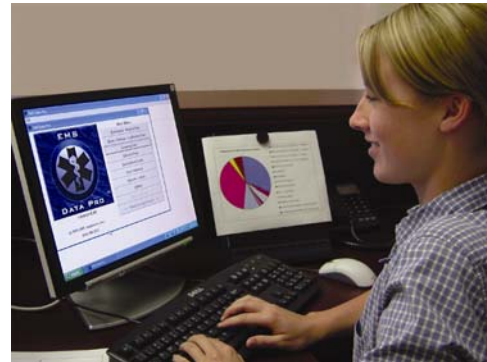

EMS Data Pro is a powerful tool for aggregating, analyzing, and reporting on your patient care data. With the knowledge gained from EMS Data Pro's powerful querying and reporting engine you will be in an optimal position to improve patient care and make informed business decisions.

Centralized storage of patient care data

EMS Data Pro allows you to aggregate CAD, Prehospital, and Hospital data in one database. With complete patient data at your finger tips you'll have the power to do meaningful data analysis that can help you achieve the ultimate goal of improved patient care.

Data can be imported from EMS Outfielder, entered directly in the data entry screen, or a custom import program can be written to get data from your CAD, Prehospital, or Hospital data system.

Continuous Quality Improvement

EMS Data Pro gives you the tools needed to:

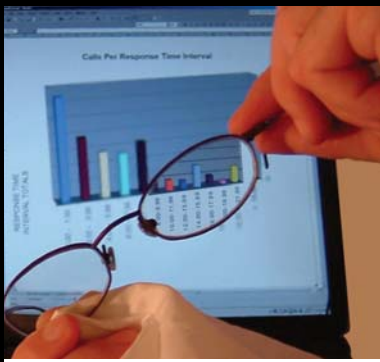

- Easily identify deficiencies, as you define them, in patient care
- Locate discrepancies between field clinical impressions and ED diagnoses
- Identify patient records where the protocols you define were not followed appropriately
- Identify abnormalities and conflicting information in your data
- Examine procedure success statistics
- Examine response and on-scene time statistics

Fast, flexible, powerful reporting

- Query on records based on any quantifiable field in the system
- Produce a wide range of detail reports including Call Detail, Patient Detail, and Field Clinical Impression to ED Diagnoses Comparisons
- Produce Time Interval Summary and Detail Reports where you define the time intervals
- Produce Procedure Success Reports
- Produce Custom Summary Reports where you select which fields are used for the rows and columns of the report. Examples include:
 - Patients per Mechanism of Injury
 - Patients by Patient Type
 - Patients by Age
 - Transported Patients by Receiving Hospital
 - Calls by Day of Week
 - Calls by Call Disposition
 - Code of Response by Code of Transport
 - The possibilities are endless!
- Produce Quality Improvement Lists
- Produce Protocol Comparison Lists
- Produce Data Validation Reports
- Schedule automatic generation of the reports you define
- Send reports to Excel and have bar charts automatically generated

EMS Data Pro™

See your data more clearly

Improve personnel data management

EMS Data Pro comes with a complete contact manager designed to meet the specific needs of EMS organizations.

- Track and report on personnel contact information, certifications, training, and CE
- Store personnel photographs and have those photographs printed on badges, certification cards, and Identification Reports
- Generate reports, address labels, or envelopes for personnel that meet the criteria you specify
- Use the EMS Data Pro's e-mail client to send fully formatted e-mails to the personnel that meet the criteria you specify
- Define mailing groups and create reports and send e-mails per mailing group

Manage and report on education provider data

Collect detailed education provider data including:

- Contact Information
- Fees
- Student Eligibility Requirements
- Programs offered
- Personnel
- Quality Assurance Notes

Generate educator reports including:

- Educator Detail Report
- California EMS Authority Educator Report

Manage resources more effectively

- Identify trends in call volume that affect staffing and unit posting
- Obtain valuable data that can help you improve your business process

Ensure data security and integrity

EMS Data Pro is password protected with 16 possible user access level configurations. Additionally, it comes with the following features that help ensure your data is always safe:

- Configurable automatic non-activity logoff
- Logging of all patient record creation, deletion, and modification
- Automatic saving of data during the data entry process
- Automatic validation during the data entry process
- A complete set of data validation tools
- Encrypted data transfers
- Fully HIPAA compliant

An industry proven, affordable solution

- Continuously improved through years of customer feedback
- Used by a wide range of organizations including ambulance providers, hospitals, fire academies, and EMS Agencies
- Affordable licensing means a rapid return on investment
