

EMS Outfielder®

Catch data on the fly!

EMS Outfielder is field data collection and electronic PCR software. Designed to facilitate fast, accurate, and comprehensive field data collection, EMS Outfielder can help you streamline your business process, saving you time and money!

Fast and comprehensive field data collection

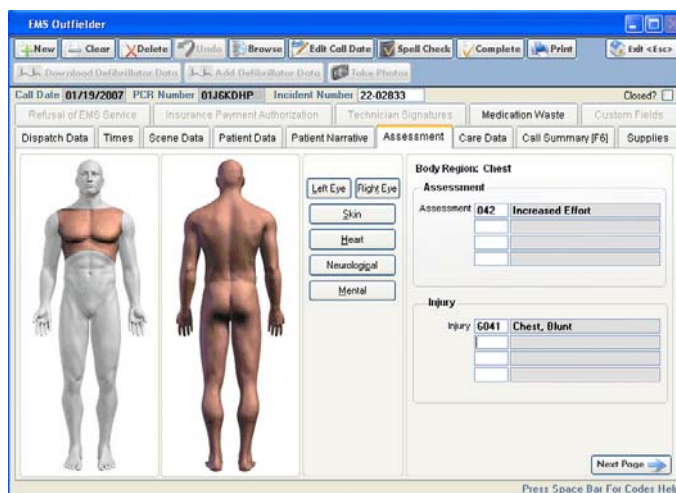

- Collect complete prehospital data including:
 - Dispatch data
 - First Responder and related times data
 - Ambulance Provider and related times data
 - Patient billing information
 - Medical and injury assessment data
 - Patient care data
 - Transfer of care data
 - Suspected Violent Injury data
 - And more
- Code Pick-Lists facilitate fast and accurate data entry
- Automatic fill in of patient data for patients who have been seen before
- Automatic fill in of the default values you have defined for fields in the PCR screen
- Ability to turn off fields you don't wish to use

Clear, complete, accurate Patient Care Reports

- Completeness Checker to ensure the fields you specify are filled in for each PCR
- On-the-fly data validation
- On-screen signature capture capability
- Ability to add photos to a Patient Care Record
- Spell Checker with medical terminology and abbreviations to prevent embarrassing spelling errors and typos

Easily track and report on supplies used

- Automatic fill in of supplies after entry of procedures or medications
- Generate Supply Reports
- Have supply data sent to your billing software

Improve personnel data management

- Track personnel contact information, certifications, training, and CE
- Store personnel photographs
- Send e-mails to your personnel directly from EMS Outfielder
- Send your personnel data to EMS Data Pro for advanced querying and reporting capabilities

Streamline your business process

- Speed up the reimbursement process and eliminate duplicate data entry with data exports to your billing software
- Use our Supervisor Review Process to streamline patient care record review and approval
- Have Personnel and Configuration data automatically updated on laptop installations when data is sent to EMS Outfielder Central

EMS Outfielder®

Catch data on the fly!

Generate reports and forms

In addition to Patient Care Reports, EMS Outfielder allows you to generate Insurance Authorization Forms, Refusal of Service Forms, Receipts for Stand-by Events, and more.

All reports can be printed, faxed, or e-mailed as encrypted attachments.

When in-depth data analysis and QA/QI reporting are needed, you can easily send your data to EMS Data Pro.

Transfer data with ease

Send data to:

- Other installations of EMS Outfielder
- EMS Data Pro, our reporting software
- Billing software
- State data systems

Encrypted data transfers can occur via e-mail, pcAnywhere connection, or any network connection (LAN, WAN, VPN).

Reduce your risk in the event of litigation

- Eliminate handwritten Patient Care Reports that may be illegible or incomplete
- Generate Refusal of Service forms and capture your patient's signature on-screen
- Use the Supervisor Review Process to ensure that all Patient Care Records are reviewed and supervisor approved
- Use the Completeness Checker to ensure all Patient Care Records are complete by your standards

Adapt the system to meet your unique needs

- Define your own Code Pick-Lists
- Turn fields in the PCR screen on and off

Ensure your data is secure

- Password protected login with multiple levels of access
- Configurable automatic non-activity logoff
- Logging of all creation, deletion, or alteration of Patient Care Records
- Automatic saving of data during the data entry process
- Multiple layers of data redundancy so you never have to worry about losing your data
- Automatic self-repair capability after EMS Outfielder abnormally ends, such as in a power failure
- Encrypted data transfers
- Fully HIPAA compliant

Customization always available

We understand that each EMS organization has unique needs. For that reason we offer a full line of software customization services including:

- Custom data entry screens
- Addition of fields and new features
- Custom reports
- Custom data transfer utilities

An industry proven, affordable solution

- Continuously improved through years of customer feedback
- Affordable licensing means a rapid return on investment
